

LIFE SAVER.

It could be the life of your specimen or the life of your business, either way our dualLevel AccuStash+ dewar monitors have you protected.

The combination of our liquid level monitor along with our new vacuum breach monitor provides you with the highest levels of dewar protection available. The vacuum breach monitor alerts you immediately if your dewar vacuum is compromised. This catastrophic failure protection gives you the earliest warning to take actions to protect what is most important to you.
