## FlexStash -80<sup>c</sup> Storage System

FlexStash is the all-in-one solution for labs that are using -80°C freezers for storing vial boxes. Our unique MaxSecure half-rack frame securely holds your boxes in place for rapid transfer to an LN<sub>2</sub> freezer should the need arise. By nesting your samples in the FlexStash, you now have the convenience of transporting all of your samples in one easy, self-contained configuration. If your -80°C freezer should ever malfunction and you need to back up to an LN<sub>2</sub> freezer, FlexStash will save you valuable time and limit specimen degeneration.

- Frame fits in standard -80°C freezers.
- Holds 81 or 100 count vial boxes.
- Drawers slide in and out.
- Half-rack frame with MaxSecure holds boxes upside down, sideways and more.
- Easily lifts out as a single unit for transfer to LN<sub>2</sub> freezer.
- Accelerates transfer time from failed -80°C freezer to LN<sub>2</sub> or other ULT backup.
- For use in any freezer.

Custody of your cryogenically stored specimen is your primary concern.

Being more efficient in doing that is our concern.

ColdsSash's driving force is to create innovative new cryogenic storage and delivery solutions that maximize freezer or dewar capacities for greater efficiencies as well as improved workplace performance.

Each component in our extensive cryogenic storage product offerings gives you a unique advantage by having the ability to store as much as 5X more samples in the same space. This allows you to maximize valued freezer space for additional cryogenic storage, reduce liquid nitrogen consumption, and lower your energy costs.

# VIALSTASH™

## VialStash Hinged Boxes

ColdStash VialStash storage boxes are designed with lab efficiency and convenience in mind. The hinged lid design allows you to quickly and easily store and retrieve vials at the same cost, or lower, as standard two-part box designs. Our new ColdStash Polycarbonate VialStash boxes are composed of high quality medical grade polycarbonate to secure safe storage applications down to -196C.

- Hinged lid is easy to open in any climate conditions.
- Available in 81 or 100 grid configuration for cryogenic vials or microtubes.
- Rigid grid insert for easy storage, visual identification and removal.
- Durable laminated construction for repeated freezing and thawing.
- Bright white box for easy labeling or customization with your branding.

Hinged Paperboard

Medical Grade Polycarbonate

# VitroStash™

## DOUBLE YOUR IVF STORAGE SPACE WITHOUT CHANGING ANYTHING IN YOUR LAB.

If you are currently using the standard 47/11 dewar for storage, ColdStash has developed a revolutionary system to easily double your storage capacities. There is no need to change anything in your lab and yet you can increase your storage from 192 patients to 384. It's that simple.

Labs worldwide are faced with storage space limitations. VitroStash is the amazingly simple, cost-effective storage enhancement solution.

- A dewar retrofit with VitroStash will cost about half of a new dewar.
- VitroStash increases current storage capacities by 2X.
- No need to change current lab configurations.
- Enhanced grid configuration allows for simple, ergonomic storage.
- Fewer dewars further reduces energy and LN<sub>2</sub> costs.
- CSD-47/127 for complete VitroStash System.

DEVELOPED IN CONJUNCTION WITH  
 BOSTON IVF

Unique "piggy-back" canister system allows for storage space to increase from 192 to 384 patients!

## INCREASE YOUR EXISTING IVF LAB STORAGE CAPACITY BY 5X!

VitroStash<sub>MAX</sub> is a simple, low-cost solution to your labs most pressing issue.

- Reduce per patient stored cost by 60%.
- 75% lower cost than large LN2 freezers.
- A simple 25% increase in dewar footprint.
- Less LN<sub>2</sub> usage and reduced energy cost.
- Fewer alarms.

INCREASE DEWAR CAPACITY TO
